

i find it hard to believe that NAB is concerned with XM radio providing weather and traffic information to their PAYING customers. XM is probably the greatest thing to ever happen to radio and i would recommend it to anyone who is interested in it. i would not complain one bit if XM took over all radio broadcasting because unlike radio, there is good music being played and the crap that is out there now is limited. leave XM alone because it is unconstitutional to prohibit them from accomodating their listeners. ththank you
